NTIS COMPUTER PRODUCTS CATALOG DATA SHEET

15. COMPUTER PRODUCT ABSTRACT

The Ada Compiler Validation Capability (ACVC) is a suite of tests designed to determine an Ada compiler's conformance to MIL-STD-1815A, the Ada Language Reference Manual (LRM). Version 1.9 was released in December 1986 and became the official ACVC version, replacing 1.8, in June 1987. ACVC version 1.9 will be the official version until June 1988 when it will be replaced by ACVC version 1.10.

Each of the 3122 tests in the ACVC 1.9 is designed to test a single test objective specified in the Ada Implementor's Guide (AIG), a document enumerating the LRM into discrete test objectives in order to aid compiler development...Software Description: The model is written in the ADA programming language for implementation on a DEC VAX-11/780 Computer using the VMS operating system. Memory requirement is 30 K bytes.

16. DATA FILE TECHNICAL DESCRIPTION

Source tape is in ASCII character set. Character set restriction preparation to 9 track, one-half inch tape only. Identify recording made by specifying density only. Call NTIS Computer Products, if you have any questions.

17. SOFTWARE TECHNICAL DESCRIPTION

Software is written in,

Fortran COBOL Basic Assembly Other Specify Ada

Software requires,

CPR Mfr. DEC VAX-11/780 Model 11-111 Operating system: VMS

Minimum of 30 K bytes core. The following special features and/or additional requirements in hardware
